CATV Installer Technician – 2 Openings

MP&W's Communications utility is seeking team-oriented, customer-focused **CATV Installer Technician** to perform telecommunications system installations and associated tasks, including drop buries, minor troubleshooting, and repair/replacement of wiring, converters, modems and other system devices. Will work with customers in performing installations, upgrades, and downgrades of service, including installation and setup of digital set-top boxes, cable modem, and PCs for Internet access and customer-owned equipment (VCRs, DVRs etc).

Qualifications and Skills:

- Must be able to operate diagnostic test equipment, including signal level and volt/ohm meters to troubleshoot service issues
- Minimum 1 year of education and work experience or equivalent work experience preferred
- Familiarity with computer software & hardware, ability to read and interpret design schematics of telecommunications system, and home-networking experience preferred
- Must be able to safely climb up to 28' extension ladders, 12' step ladders, and work from elevated platform or bucket trucks up to 50', as well as work outdoors in inclement weather conditions
- Valid driver's license with chauffeur's designation or able to acquire Chauffeur's designation within 90 days of hire required
- Must be available for overtime, with ability to work flexible hours as required/needed. This position requires ability to be on rotation for standby and primary residence maintained according to terms of MP&W Residency Policy
- Bilingual skills (English/Spanish) a plus
