FOR IMMEDIATE RELEASE

MP&W OUTAGE & DISCOLORED WATER ADVISORY

In the area of Highway 61 and 33rd street, a contractor working to bring a fiber connection to the new Armory Building hit and tripped one of our primary electrical feeds coming out of the Grandview Substation. This resulted in a 10 - 15 minute outage for customers in Progress Park and along Highway 61. It also interrupted power to 8 water production wells. This interruption and re-start of water production will likely cause discolored water throughout most of the water system. We apologize for this inconvenience and we are working to minimize the discolored water situation.
