### Programming And Operating Instructions

To ensure a seamless and optimal experience, please follow these steps carefully.

#### 1. Introduction
Your remote control is simple to program. With four easy steps, you can replace your device's remote control with another one.

**Cable:** Western Digital WD-4210

Before using your remote control, you'll need:

- A new remote control
- A programming code

#### 2. Setting Up Remote

**Some of the features may not be available in your remote control service area.**

**Programming:** Programming your new remote is straightforward. First, ensure the batteries are installed correctly. Then, follow these steps:

1. **Reorient the Device:** Always orient the device to the TV or cable box you want to control.
2. **Set the Frequency:** Check that the device is set to the correct frequency.
3. **Test the Remote:** After programming, test the remote to ensure it works as expected.
